

NORWOOD

NEVER ORDINARY

◆ Product improvement: Our flat casings will now be run with one blind fastening notch only as requested by many of you. This change is ongoing in the plant but we still have stock with two notches that we will be using. Therefore, until those are depleted, make sure to mention if only one is needed on your orders. I have showing the EM544 only but this change will apply for all flat trims.

544

1 1/8" X 3 1/2"

544

1 1/8" X 3 1/2"

◆ New traditional locks with finger lifts as mentioned in our last newsletter are now available to chose in the software.

◆ Next PK release changes:

✓Norclad product will default to a nailing fin only with installation straps included. If trim is required, it will need to be chosen in the software options.

✓We have been listening and you will be happy to know that the Polyurea primer pricing has been lowered for the next release to make you more competitive.
